7. CINT Toll Free Service1. General

CINT Toll Free Service is an inbound switched Service from various overseas locations to the U.S. and is available to Customers of CVNS, CVE, CS, CNAT Toll Free, CE Toll Free, CBF International, and Services. Calls will be billed in six-second increments with a 30-second minimum.

- .01 The Customer must maintain atoll free incomplete call ratio (i.e., the number of incomplete calls divided by the total completed calls) not to exceed 10%. Incomplete calls include calls that are not completed because of a busy signal, no answer, area code blocking, Customer network blockage, hang-up before completion, or other cause. If the Customer's incomplete call ratio exceeds 10%, Carrier reserves the right to charge \$.25 per call for all incomplete calls.
- .02 The Customer's average international toll free call duration must equal or exceed three minutes. If this three-minute minimum average time requirement (MATR) is not met, Carrier reserves the right to charge \$.25 per minute for the total number of deficient minutes less than the required minimum. For example, total number of specified international toll free calls times the three-minute MATR, less the total international toll free actual minutes billed equals the number of deficient minutes for the month. Multiplying the deficient minutes times the \$.25 surcharge equals the monthly MATR surcharge.
- .03 The Customer must have at least 60 minutes of usage per international toll free number over any consecutive three-month period.

.04 CCUIFN

CUIFN is a feature of CINT Toll Free Service. It is a dial plan which allows a caller to dial the same international toll free access number from multiple foreign countries to reach the Customer in the U.S. CUIFN toll free numbers are assigned and administered by the International Telecommunications Union (ITU) and are subject to availability. CUIFN may not be available from all countries from which CINT Toll Free is available. Reserved numbers must be put into service between at least two locations within 90 days. Standard CINT Toll Free set-up and usage fees apply, in addition to a one-time reservation of the CUIFN number fee. The CUIFN number reservation fee is non-refundable and will be assessed whether or not the Customer receives the number for which the Customer applied.

3. SERVICE DESCRIPTION & RATES (Cont.)9. Operator Services1. Description

Operator services will be available for calls originating from pay phones as well as to customers who are presubscribed to Carrier for calls to the countries specified in Section 4.2. Carrier will handle Credit Card calls, Collect calls (to Canada only), Operator Station calls, Person-to-Person calls, Third Party billed calls, Directory Assistance calls, and International Directory Assistance (IDA) calls. IDA provides the caller with directory assistance from any foreign destination where directory assistance is available. An IDA surcharge will be assessed in the event the caller chooses to use direct dial service for completion of the call. In addition, applicable direct dial rates will apply. Should the caller elect operator assisted call completion, IDA surcharge will not apply; operator service rates will apply. Except as otherwise specified, the initial period is 3 minutes. Additional minutes will be billed in one-minute increments.

In addition, a \$.75 per call Operator-Dialed Surcharge will be assessed when the caller has the capability to dial the digits necessary to complete the call, but requests the operator to dial the called station. This surcharge applies to Operator Station and Person-to-Person calls to Mexico and Canada and to Operator Station and Person-to-Person international calls. This surcharge does not apply to:

- .01 International calls originating from local exchange offices that do not have international direct distance dialing capability.
- .02 International calls to countries to which direct distance dialing capability is not available.
- .03 Calls where a customer cannot otherwise dial the call, due to defective equipment or trouble on the network.
- .04 Calls in which a company operator places a call for a calling party who identifies himself/herself as handicapped and unable to dial the call because of his/her handicap.

Presubscribed customers may originate operator service calls in the cities specified in Section 4.1.
